PROFILE

As a seasoned Frontend Web Developer with a year of hands-on experience, I bring a creative and detail-oriented approach to crafting seamless user experiences. Proficient in HTML, CSS, JavaScript, Wordpress and Elementor, I have a proven track record of translating design concepts into responsive and visually appealing websites. My commitment to staying abreast of emerging technologies and my ability to collaborate effectively with cross-functional teams make me a valuable asset in delivering high-quality web solutions.

PROJECTS

PLAY &BET

Description

Developed a dynamic betting application with a responsive and modern interface using HTML, CSS, Bootstrap, and JavaScript. Leveraged React JS for dynamic and interactive features, providing real-time updates on sports events, odds, and live scores. Implemented a secure betting system for users to easily place and track their bets. Ensured cross-browser compatibility and optimized performance for smooth user interactions. Incorporated user feedback for continuous improvement.

Rentarbo Web

Description

Led the development of Rentarbo Web, a robust e-commerce platform, using HTML, CSS, Bootstrap, and JavaScript to create a responsive and visually appealing interface. React JS was used for dynamic components and efficient state management, enhancing user experience. Developed an intuitive product catalog with seamless navigation and a robust search feature for quick product access. Implemented secure user authentication and account management systems, allowing customers to track orders and manage preferences. Integrated a feedback system for customer reviews and ratings, promoting transparency and informed purchasing.

TrymeFZC

Description

Developed TrymeFZC, a fully functional web application based on a Figma community design, using HTML, CSS, JavaScript, and Bootstrap. Brought the design to life with an intuitive and responsive user interface, ensuring a seamless browsing experience. The website is live and accessible via GitHub Pages at https://madeenali.github.io/TrymeFZC/index.html.

WORDPRESS PROJECTS

Sunrise Grass Cutting

Description

Created the SunRise Grass Cutting website, a platform for a grass cutting company, using WordPress and the Elementor plugin. Designed and implemented a user-friendly site with a professional look, showcasing services and providing easy navigation for customers. The website enhances the company's online presence and simplifies service inquiries and bookings.

Opening Heart Digital Gateway

Description

Developed the OpenHearts website, a platform designed to support business growth, using WordPress and the Elementor plugin. Crafted a visually appealing and functional site to enhance business visibility and engagement, featuring intuitive navigation and effective presentation of services. The website supports the company's expansion efforts by providing a professional online presence.
